

Hospitality Analytics

An interactive dashboard to analyse hotel performance, tracks key metrics, understand trends and make data-driven decisions.

Revenue

Total income generated from room bookings and hotel operations.
Helps evaluate the overall financial performance of the hotel.

RevPAR

Measures how effectively the hotel generates revenue from its available rooms.
Helps understand the hotel's average room pricing and earning level.

DSRN

Average number of rooms available for sale each day.
Helps track the hotel's daily room inventory and selling capacity.

Realisation %

Percentage of booked rooms that are successfully utilized by guests.
Helps evaluate booking conversion and the effectiveness of room utilization.

Go to Dashboard

Occupancy %

Percentage of available rooms that are occupied by guests.
Helps measure how effectively the hotel is utilizing its available rooms.

Data Coverage: [May 22 - Jul 22]

Analysis: Revenue • Bookings • Occupancy • Pricing • Property Performance
